

Breakout session: Planetary formation (young stars, exoplanets, solar system)

Organizers: Mike Wong, Manoj Puravankara, Thayne Currie

Tuesday Nov. 05

Chair: Manoj Puravankara

Start	End	Presenter	Title
14:00	14:20	Priya Hasan (Maulana Azad National Urdu University, Hyderabad)	IMF Studies in the TMT era
14:20	14:40	Karen Meech (Institute for Astronomy)	Small Solar System Bodies and Interstellar Objects: Synergies Between LSST, JCMT and TMT
14:40	15:00	Karen Meech (Institute for Astronomy)	TMT and Small Body Missions
15:00	15:20	Michael H Wong (UC Berkeley)	TMT Synergy with Spacecraft Exploration of Outer Planet Systems
		Coffee break at 15:30	

Chair: Greg Herczeg

16:00	16:20	Manoj Puravankara	Demographics of exoplanets
16:20	16:40	Chris Packham (University of Texas at San Antonio)	Exoplanet direct imaging
16:40	17:00	Chris Packham (University of Texas at San Antonio)	MICHI: Status Update
17:00	17:30	Discussion	Summarizing planetary formation synergistic science cases between TMT and 2030s facilities +

Wednesday Nov. 06

Chair: Mike Wong

09:00	10:30	Discussion	TMT science within the 2020 U.S. Planetary Science Decadal Survey
